Petrol and diesel engine driven piston compressors
for your remote applications

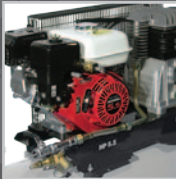

Versatile engine compressors for remote applications

The freedom to do what you want, when you want, wherever you want. To be independent under all circumstances. Who wouldn't like that? As a small building contractor or a larger construction company, if you are in harvesting business or a farmer; this is your tool.

You'll be excited about this: a range of unplugged diesel and petrol engine belt driven compressors that are easy to move, that can cope with different air demands, that can power multiple tools at the same time and simultaneously provide a steady air flow; the BlengineAIR range comprises a two-in-one solution that can provide you with both air and electricity in remote locations.

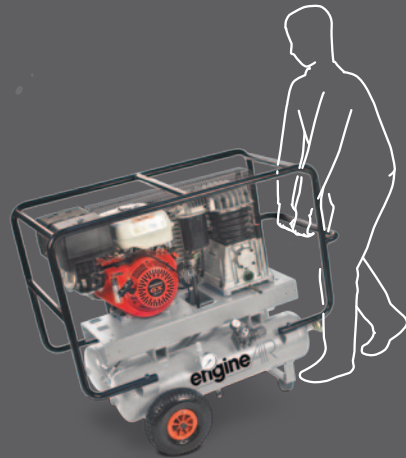

With these versatile engine compressors you are totally independent from energy sources, giving you total availability of compressed air in all circumstances. Giving you total freedom.

engineAIR

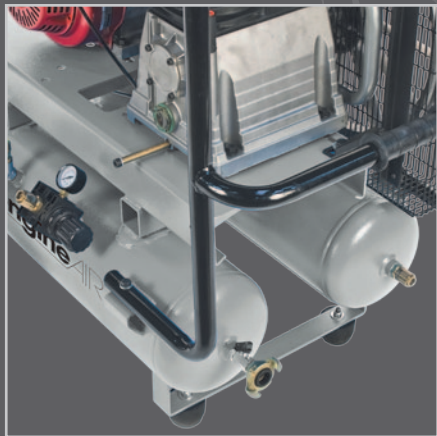

Petrol Engine

Supersilenced version
Worldwide service support

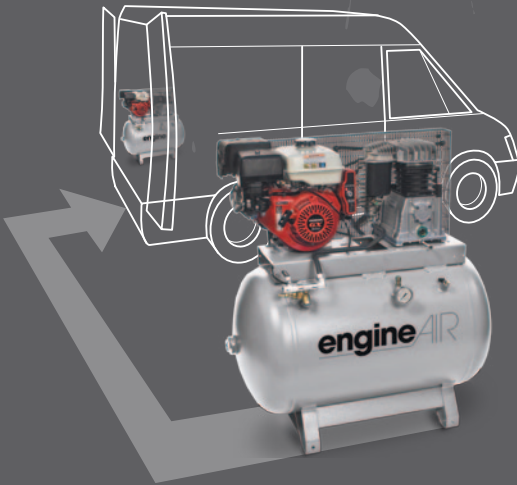

Metal Rollbar
Offers full protection.
Easy to carry, easy to move

Twin tank version:
3 connections for 2 pressures and 1 big flow
Inbuilt connection flexibility for different demands

Ergonomic handle and large pneumatic tyres
For easy movement over difficult terrain

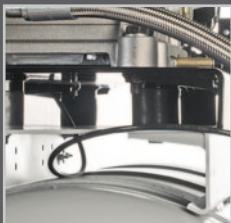

Easy to build in
For easy transportation to and use on site

Diesel Engine

Low fuel consumption

Anti-vibrating pads
Less vibrations, lower noise level and increased life time of your outside buddy

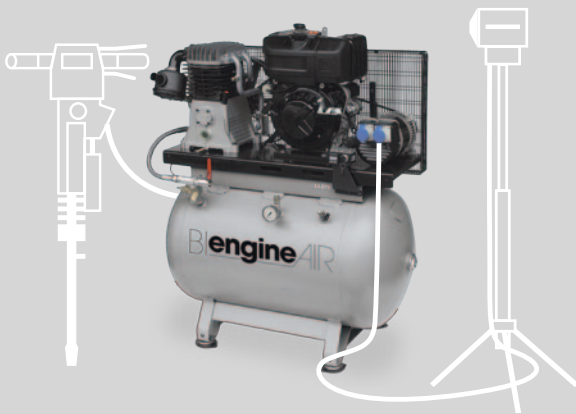

Easy maintenance
Led control panel, oil pressure and battery recharge indicator

Bi-Energy

The two-in-one solution with small footprint

One powerful motor, supplying both air and energy. Generator with electricity plug at 230 volt

11 Hp (max) 2kva (max)
